

A4

11. (Amended) The method according to claim 1, wherein the macromonomer has ethylenically unsaturated bonds at least at two ends.

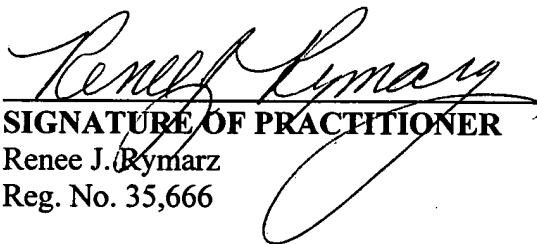

REMARKS

Claims 6 -11 have been amended to eliminate multiple claim dependency and to conform to U.S. style. The specification has been amended to include U.S. style headings. No new matter has been added.

Attached hereto is a marked up version of the changes made to the claims by the current amendment. The attached pages are captioned "**Version with Markings to Show Changes Made**".

Action on the merits is respectfully requested.

Respectfully submitted,

Page 1, text beginning with the title through paragraph [0001] was amended as follows:

[SPECIFICATION]

METHOD FOR PRODUCING AQUEOUS RESIN DISPERSION COMPOSITION

[TECHNICAL FIELD] BACKGROUND OF THE INVENTION

The present invention relates to a method for producing an aqueous resin dispersion composition, which is advantageous in that the emulsion state thereof can be kept stable even when a solvent coexists with the dispersion. The aqueous resin dispersion composition is advantageously used as, for example, paint and adhesive.

[BACKGROUND ART]

On page 3, the section heading [DISCLOSURE OF THE INVENTION], was replaced with SUMMARY OF THE INVENTION.

On page 5, the section heading [BEST MODE FOR CARRYING OUT THE INVENTION], was replaced with DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS.
